DETAILED ACTION

Allowable Subject Matter

Claims 21-29 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: All independent claims require treating a surface with a cluster comprising a first molecule and a second molecule, bound together by intermolecular forces, wherein the first molecule is in a state of higher reactivity than the first molecule in the state of not being bonded to the second molecule by utilizing at least part of the internal energy releases in producing the cluster. As in the parent application, the examiner found no prior art that disclosed or which made obvious this aspect of the claimed invention.

Conclusion

The prior art cited on the attached PTO form 892 is made of record as it is considered pertinent to applicant's disclosure.
